DIRECTOR WORD

As the world becomes increasingly digital, the importance of cybersecurity cannot be overstated.

Cyber threats are evolving rapidly, and we are responsible for staying ahead of the curve and providing our clients with the best possible protection.

MOHAMED HAROON
Partner & Director

ABOUT US

Panglobe is a certified cybersecurity consulting firm and a trusted provider of cybersecurity solutions, boasting over **20 years of collective expertise** in safeguarding businesses and organizations against ever-evolving cyber threats. In today's fast-paced digital landscape, having a reliable partner like Panglobe is crucial for businesses seeking a dedicated guardian for their data and systems.

PANGLOBE IS YOUR RELIABLE PARTNER

Our comprehensive services cater to various sectors, encompassing, but not limited to, Telecom, Government, Oil & Gas, Education, Private sectors, and Retail Banking. In a world where cyber attacks are a constant concern, Panglobe stands out as the go-to partner for ensuring the security and resilience of your critical assets.

UNIQUE SOC

We help medium to large enterprises embrace the cloud revolution through unique SOC as a service solution, with extensive services across sales, marketing, technical, and nance, and through leading solutions designed to prevent and respond to sophisticated cyber incidents and promote growth.
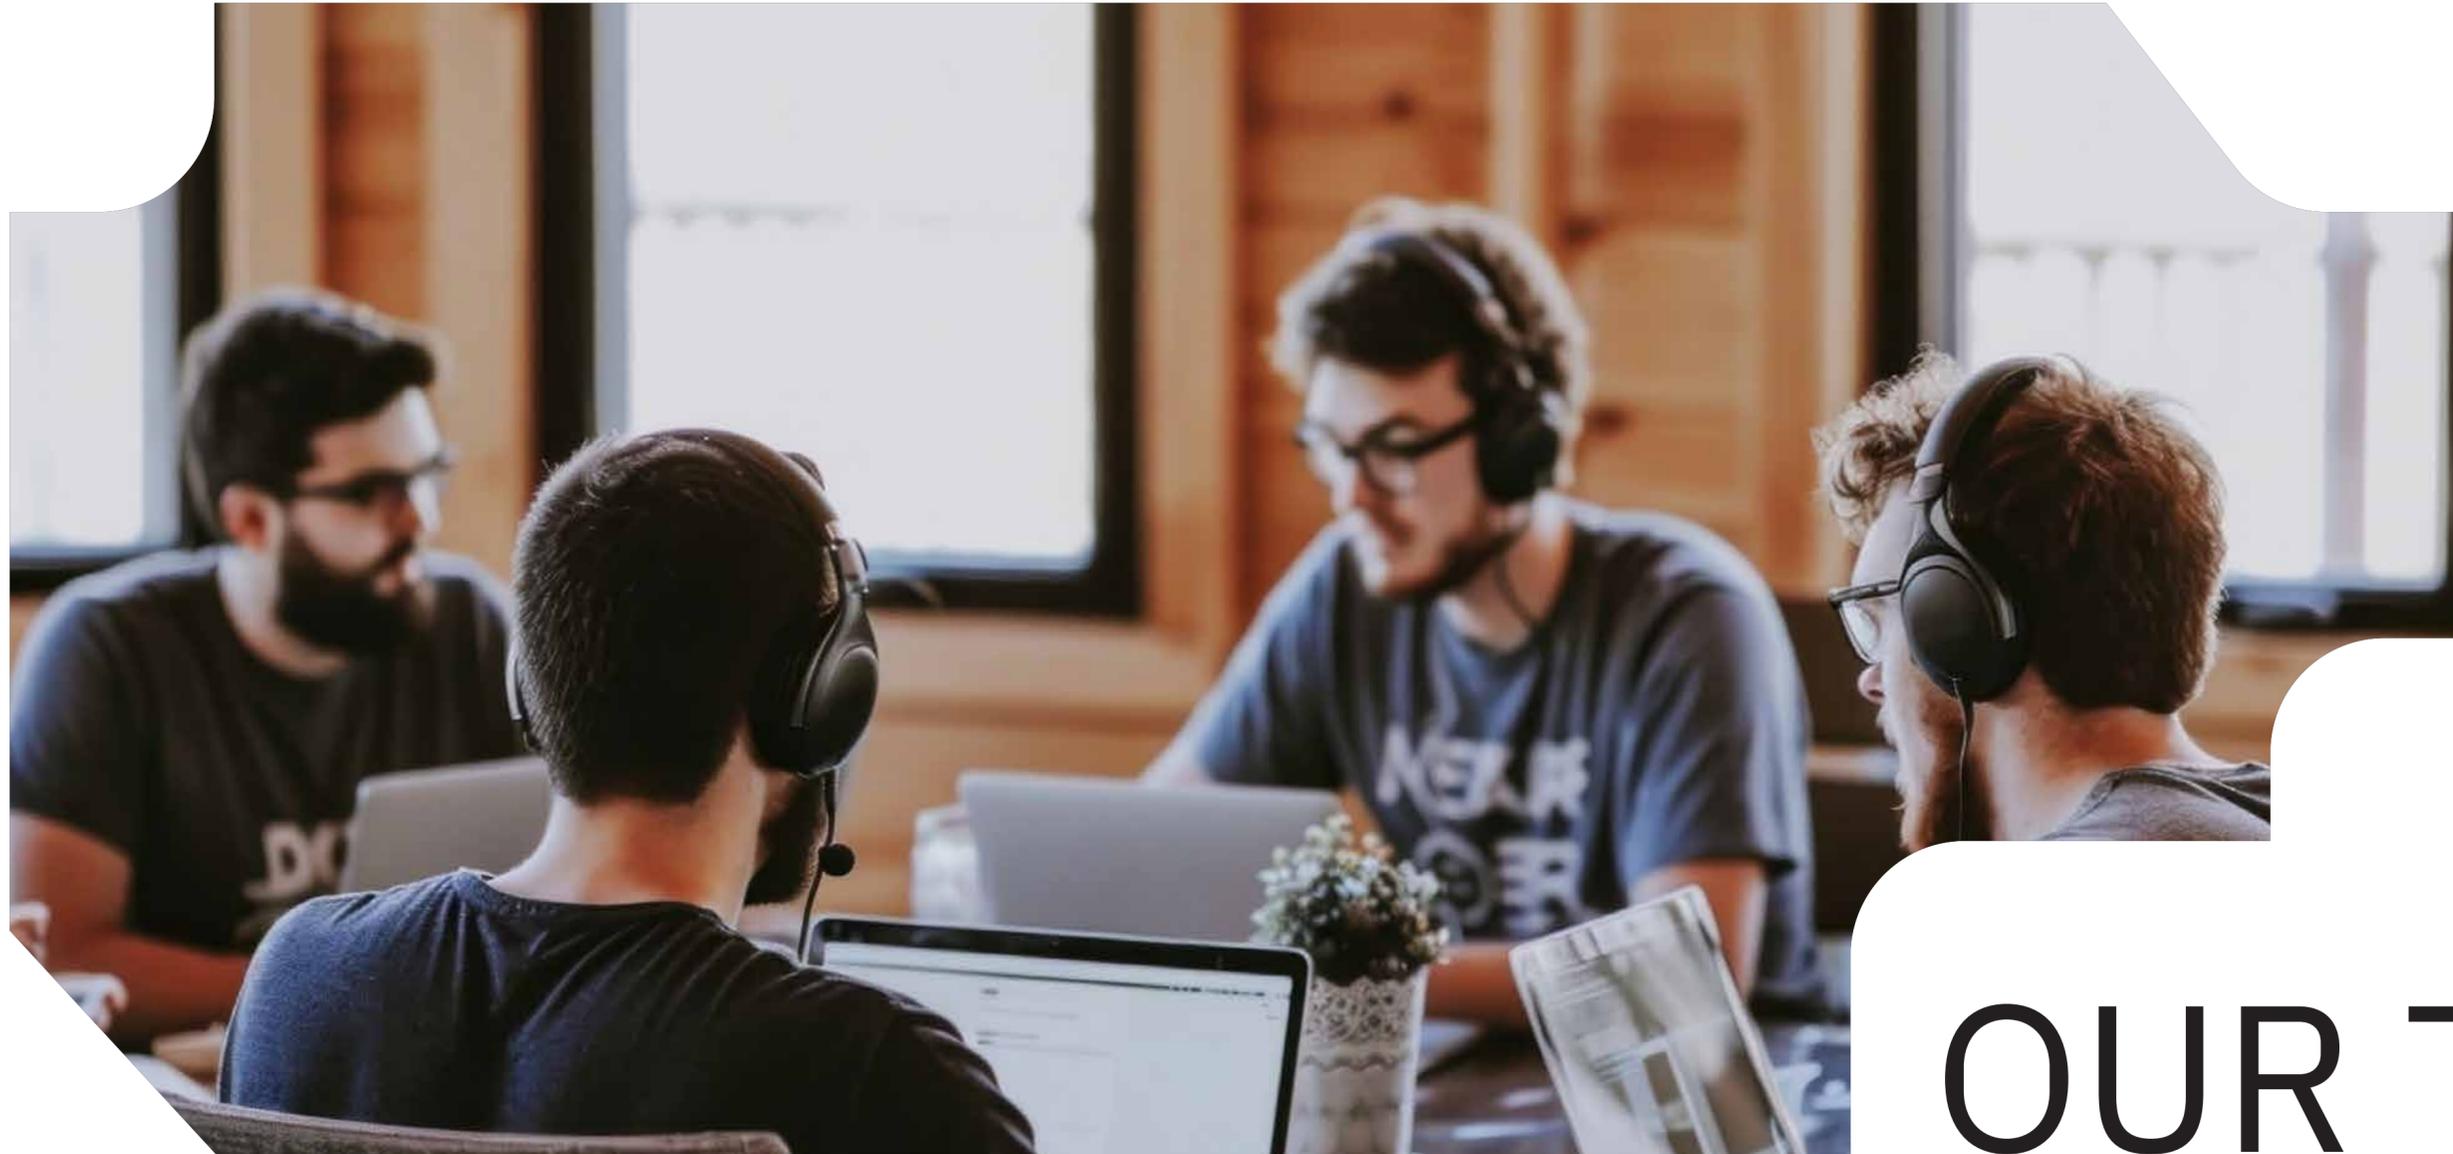

OUR TEAM

Our team of forward-thinking cybersecurity specialists operates 24/7, staying abreast of the latest technological advancements to deliver state-of-the-art cyber security solutions to businesses in the region.

LONG-TERM PARTNERSHIP CHARACTERIZED

As a result, numerous global technology vendors acknowledge us as the optimal candidate for a value-added distributor in the area, enabling them to penetrate local markets and expand their market presence.

Remaining at the forefront of innovation, we offer tailored solutions that align with the unique requirements of each client.

Our commitment extends beyond initial engagements, ensuring a distinctive long-term partnership characterized by secure business growth and unwavering after-sales dedicated service for clients across diverse segments.

OUR VISION

Our primary goal is to lead the way by being dynamic and innovative, with a strong emphasis on placing customer care at the core of everything we do. As part of our broader vision for a secure future, we aim to establish ourselves as the ultimate go-to cybersecurity provider in the region.

ROBUST DEFENSES,
SECURE INFRASTRUCTURES
ENSURE DATA INTEGRITY
FOSTERING A RESILIENT &
SECURE DIGITAL ECOSYSTEM

OUR MISSION

Panglope exists to safeguard digital assets and sensitive information from cyber threats. In the Kingdom of Saudi Arabia (KSA) and the Middle East, its mission is to provide robust defenses, secure infrastructures, and ensure data integrity, fostering a resilient and secure digital ecosystem.

PROOFPOINT

Panglobe   proofpoint.
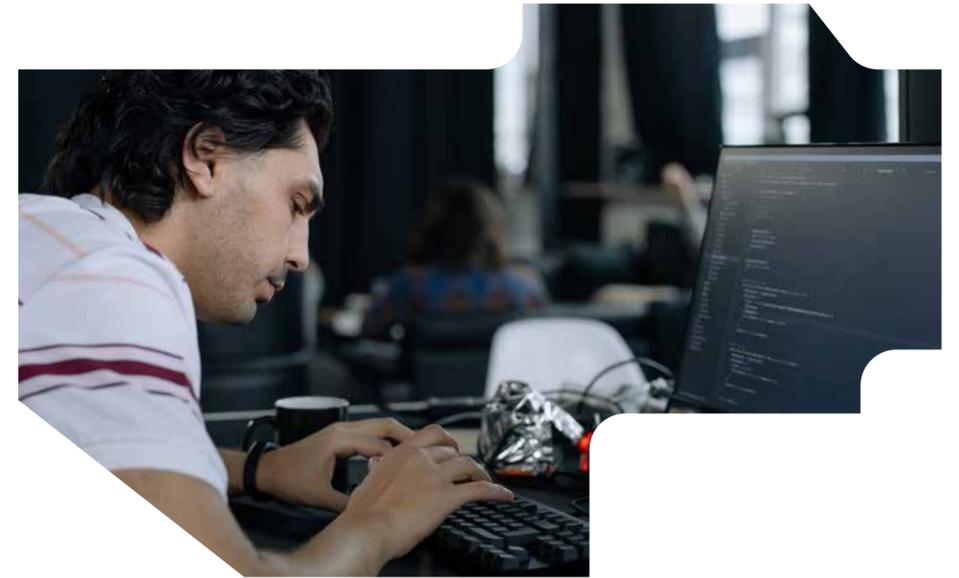

was Founded in

2002

ABOUT PROOFPOINT

Proofpoint is a cybersecurity company that provides a range of security and compliance solutions for businesses and organizations. The company was founded in 2002 and is headquartered in Sunnyvale, California.

Proofpoint's solutions cover a range of cybersecurity areas, including email security, advanced threat protection, data loss prevention (DLP), cloud security, and compliance.

In addition to its cybersecurity solutions, Proofpoint also offers compliance solutions to help businesses and organizations meet regulatory requirements, such as GDPR and HIPAA.

PROOFPOINT & PANGLOBE

Panglobe and Proofpoint boast a strong and reliable partnership in the realm of cybersecurity.

Leveraging Proofpoint's expertise, Panglobe has successfully delivered top-notch security solutions, collaboratively offering advanced technology to safeguard organizations against cyber threats. This alliance ensures a dependable and cutting-edge approach to cybersecurity.

PROOFPOINT FRAMEWORK & SOLUTIONS:

1- Comprehensive visibility

Know who is being attacked and how. Identify your Very Attacked People™ (VAPs).

2- Unparalleled efficacy

Detects more threats accurately with ML and behavioral analytics.

3- Operational efficiency

Reduce your team's workload.

4- Continuous discovery

Discover and prioritize identity vulnerabilities.

5- Automated remediation

Automatically purge risks from endpoints and servers.

6 - Runtime detection

Deploy deception for failsafe intruder detection.

RELIABLE PARTNERSHIP

7 - Powerful context

Leverage the power of context between data, behavior and threats.

8 - Unified visibility

Get visibility into and prevent data loss and insider risk across channels.

9- Insider investigation

Investigate insiders while protecting their privacy

10 - Accelerate time to value

Implement a streamlined and highly scalable cloud-native deployment.

INVICTI

Panglobe

ABOUT INVICTI

Invicti Security is a cybersecurity company that provides web application security solutions for businesses and organizations. The company was founded in 2017 and is headquartered in Boston, Massachusetts.

Invicti Security's flagship product is the Acunetix web vulnerability scanner. Invicti Security also offers a suite of other web application security tools, including a web application firewall (WAF) and a runtime application self-protection (RASP) tool.

(WAF)& (RASP) tools

These tools help businesses and organizations to protect their web applications from attacks and to ensure the security of their data.

Invicti delivers the most accurate and efficient DAST solution for DevOps/DevSecOps teams to discover and secure all the applications that run their organizations.

# WATCHGUARD

Panglobe   WatchGuard®

ABOUT WATCHGUARD

WatchGuard is an award-winning global leader in network security, endpoint security, secure Wi-Fi, multi-factor authentication, and network intelligence.

FOR 25 YEARS

For 25 years, WatchGuard has pioneered cutting-edge cybersecurity technology and delivered it as easy-to-deploy and easy-to-manage solutions. WatchGuard is headquartered in Seattle, Washington, with offices throughout North America, Europe, Asia Pacific, and Latin America.

WATCHGUARD & PANGLOBE

The strong and long-standing partnership between Gatelock and WatchGuard has been instrumental in providing Panglobe with one of its most robust and successful security solutions, "Panda."

The specialization provided by WatchGuard throughout the partnership has been critical in enabling Panglobe to deliver superior security solutions to its customers.

WATCHGUARD FRAMEWORK & SOLUTIONS:

1- Network Security

WatchGuard Firebox is a comprehensive, advanced network security appliance that puts IT security pro-fessionals back in charge of their networks with widely deployable, enterprise-grade security and threat visi-bility tools suitable for any organization, regardless of budget, size, or complexity.

2- Multi-factor Authentication

AuthPoint multi-factor authentication (MFA) provides the security you need to protect identities, assets, accounts, and information. Let your company work confidently and worry-free with easy-to-use, cost-effective and complete multi-factor authentication.

4- Endpoint Security

Today's threat landscape is highly sophisticated and the volume of new viruses is unprecedented. Combat this new reality by deploying WatchGuard Endpoint Security.

It gives you the ability to easily manage the technologies – including next-gen antivirus, EDR, and DNS filtering solutions – required to stop advanced cyberattacks, along with a full stack of integrated modules for additional layers of protection for patching, extended visibility, and data control.

3- Secure Cloud Wi-Fi

WatchGuard elevates your wireless experience through Wi-Fi 6 access points, centralized management, and intelligent reporting.

4- DATAPATROL

DataPatrol is a software company with a specialized focus on enhancing the security and privacy of company data and information. Prioritizing data security as our utmost concern, DataPatrol offers innovative and user-friendly solutions aimed at safeguarding sensitive and confidential internal data from unauthorized disclosure.

Panglobe

DATAPATROL

DATAPATROL FRAMEWORK & SOLUTIONS:

1| Screen watermark

DataPatrol's Digital Screen Watermark Solution enhances internal data control by applying detailed watermarks to end-user desktops and servers. With granular policy control, it allows customization for different users and groups, offering a distinct look and design for specific watermarks.

2| Anti Copy Solution

DataPatrol's AntiCopy feature enables administrators to control text copy functions on Windows machines, preventing data duplication and errors during specific processes or program execution. Users are restricted from copying text or data to the clipboard when this feature is activated.

3 | Prtsc Prevention

DataPatrol introduces an Anti PRTSC feature that combats screen capturing through capture keys and third-party apps, a common method of data theft. When activated, this feature allows users to take screenshots, but the captured image will display as a black rectangle.

4 | Printing Watermark

DataPatrol's Printing Watermark feature adds dynamic watermarks with user data to all printed documents, whether to a physical printer or a PDF/XPS file. This helps protect content, assert ownership, and guard against content theft or unauthorized use of valuable printed documents.

LinkShadow

About LinkShadow

LinkShadow leads the charge in cybersecurity innovation, delivering next-generation solutions to tackle evolving and complex threats. Our flagship LinkShadow Cyber Mesh Platform, powered by the Cyber Security Mesh Architecture (CSMA), provides unified, adaptive, and scalable security. Designed for enterprises and MSSPs, LinkShadow ensures robust protection for digital ecosystems worldwide.

LINKSHADOW FRAMEWORK & SOLUTIONS:

1

LinkShadow Cyber Mesh Platform

- Distributed, interconnected security controls for seamless protection.

- Real-time threat detection, prevention, and response capabilities.

- Resilient architecture, eliminating single points of failure.

2

Empowering MSPs and MSSPs

- Scalable solutions for growing client bases.

- Centralized management for streamlined operations.

- Flexible deployment options across diverse environments.

- Detailed, customizable reporting for client insights.

LINKSHADOW
FRAMEWORK & SOLUTIONS:

3

Advanced Solutions

- **Network Detection & Response (NDR):**
  Real-time visibility and network threat neutralization.

- **Open XDR:**
  Unified correlation and insights across security domains.

- **UEBA:**
  Proactively identifies insider threats and behavioral anomalies.

- **Cloud Detection & Response (CDR):**
  Tailored cloud environment security.

- **Data Security Posture Management (DSPM):**
  Compliance strengthening and sensitive data safeguarding.

- **Managed Detection and Response (MDR):**
  24/7 fully managed monitoring and incident response.

Benefits of LinkShadow

- **Unified Cybersecurity Framework:**
  Eliminate silos with interconnected solutions.

- **Proactive Threat Mitigation:**
  AI and real-time analytics for early detection

- **Ease of Deployment:**
  User-friendly interfaces and quick implementation.

- **Centralized Management:**
  Simplify security operations via a unified dashboard.

- **Scalability:**
  Solutions designed to grow alongside your organization.

Utimaco

utimaco® Panglobe

About Utimaco

Utimaco is a global leader in cybersecurity and compliance solutions, specializing in data protection, key management, and data intelligence.

With headquarters in Aachen, Germany, and Campbell, California, USA, Utimaco provides cutting-edge on-premises and cloud-based solutions to secure regulated critical infrastructures and Public Warning Systems (PWS).

Trusted by enterprises, governments, and industries worldwide, Utimaco is committed to innovation, reliability, and safeguarding data and communication networks for a safer digital future.

UTIMACO FRAMEWORK & SOLUTIONS:

1.Data Security Solutions

Data Protection: Robust encryption solutions that protectsensitive information from cyber threats and unauthorized access.
Secure Payments: End-to-end security for payment systems, safeguarding customer data and brand reputation.
Data Protection: Robust encryption solutions that protectsensitive information from cyber threats and unauthorized access.
Secure Payments: End-to-end security for payment systems, safeguarding customer data and brand reputation.
Key Management: Comprehensive solutions for encryption key generation, storage, and control, with full auditability.
Centralized Management: Simplified HSM operations through centralized tools for monitoring and administration.

2.Compliance & Regulatory Solutions

Compliance with Global Standards: Meeting stringent regulations like GDPR, PCI DSS, and telecom laws for data protection.
Industry-Specific Solutions: Tailored offerings for industries like finance, telecommunications, and critical infrastructure.

UTIMACO FRAMEWORK & SOLUTIONS:

3.Telecommunications Solutions

Critical Event Management (CEM):): Advanced software solutions to enhance security and response during emergencies

Data Retention: Compliant data preservation tools for telecommunications companies, ensuring regulatory adherence.

Lawful Interception: Legally compliant tools for monitoring telecom networks for law enforcement.

Public Warning Systems (PWS): Global leader in mass notification systems, enabling real-time communication during crises.

Key Benefits

- **Enhanced Data Protection:**
  Comprehensive encryption and key management to secure sensitive data.

- **Global Compliance:**
  Solutions that adhere to stringent regulations, ensuring peace of mind.

- **Scalable & Flexible:**
  Adaptable to organizations of any size, growing with your business.

- **Simplified Management:**
  Streamlined monitoring and control of HSMs with centralized management tools.

- **Trusted by Industry Leaders:**
  Proven reliability across finance, telecom, and critical infrastructure sectors.

- **Support for Lawful Operations:**
  Tools like lawful interception and public warning systems ensure compliance with legal standards

- **Long-Term Reliability:**
  Future-proof solutions for sustainable security investments.

CheckMarx

Panglobe   Checkmarx

About
CHECKMARX

Checkmarx is a global leader in application security, focused on empowering organizations to secure the software driving digital transformation. Specializing in cloud-native application security, Checkmarx provides a unified platform integrated into the software development lifecycle (SDLC). Its solutions enable enterprises to identify, remediate and prevent vulnerabilities across source code, open-source components, APIs, containers, and more. Trusted by thousands of organizations worldwide, Checkmarx promotes collaboration between development and security teams, ensuring businesses stay ahead of evolving cyber threats.

CHECKMARX FRAMEWORK & SOLUTIONS:

Checkmarx offers a comprehensive suite of solutions designed to integrate seamlessly into modern development environments:

- **Checkmarx One**:
  A unified, cloud-native platform securing applications from code creation to cloud deployment.

- **Static Application Security Testing (SAST):**
  Fast, accurate scans that help developers identify vulnerabilities early in the development process.

- **Software Composition Analysis (SCA)**:
  Manage open-source risks by identifying vulnerabilities, malicious code, and license issues

- **Dynamic Application Security Testing (DAST)**
  Detect vulnerabilities in live applications for a complete view of application risk.

- **API Security:**
  Secure APIs early in the SDLC to address vulnerabilities quickly.

- **Container Security:**
  Ensure secure deployment and runtime of containerized applications.

- **Infrastructure as Code (IaC) Security:**
  Identify and mitigate cloud infrastructure vulnerabilities.

- **AI-Powered Security:**
  Enhance efficiency and tackle emerging threats with AI-driven tools.

Benefits of Checkmarx Solutions

Comprehensive Security Coverage

Protects every phase of the SDLC, from code creation to deployment.

Enhanced Developer Efficiency

Developer-friendly tools that integrate security into workflows without compromising productivity.

Proactive Threat Management

Mitigate vulnerabilities early in the process to avoid costly risks later.

Regulatory Compliance

Simplify compliance with industry standards through automated security practices and tools.

Cost-Effective Scalability

Scalable solutions that grow with your enterprise's needs, from small projects to large-scale operations.

BUILD38

 build38   Panglobe

Build38 is a global leader in mobile app security, dedicated to securing digital experiences in a mobile-first world. Based in Munich, Germany, Build38 offers innovative solutions to safeguard mobile apps, backend systems, and users against evolving cyber threats.

By combining cutting-edge cloud, AI, and no-code technologies, Build38 delivers comprehensive protection, enabling businesses to prevent cyberattacks, gain actionable insights, and respond swiftly to vulnerabilities. With a focus on user satisfaction and innovation, Build38 helps organizations confidently navigate the complexities of mobile app security across industries like banking, healthcare, automotive, and government.

About Build38

BUILD38
Framework & Solutions

Build38's security platform provides end-to-end protection, incorporating cloud in-app, and AI-driven technologies to secure mobile applications.

Mobile In-App Protection

Ensures runtime environment verification, code integrity, data protection, and strong cryptography to prevent unauthorized access.

Active Hardening

Adaptive security profiles and cryptographic instance individualization to enhance device binding and reduce risks from unauthorized access.

Cloud-Based Threat Intelligence

Automated threat response, real-time threat intelligence, and custom APIs for tailored security solutions.

User Interface Protection

Secures sensitive data inputs like PINs with advanced UI elements for enhanced trust

- **End-to-End Security:**

  Provides robust protection across apps, backend systems and user data.

- **Advanced Threat Detection:**

  AI-powered detection to identify sophisticated attacks reducing false positives and improving security efficiency.

- **Scalability:**

  Modular, adaptable solutions to grow with your business securing apps across multiple operating systems and environments.

- **Simplified Compliance:**

  Tools for meeting industry regulations like PCI-DSS, eIDAS 2 and GDPR.

- **Enhanced Customer Trust:**

  Ensures user data security and app integrity, fostering brand loyalty.

Benefits of Build38 Solutions
